IMPULSE POINT PROVIDES ENDPOINT SECURITY SERVICE FOR NATIONAL COMMUNITY COLLEGE IT CONFERENCE

Safe.Connect™ Ensures Security Policies are Maintained

Dallas, TX, October 14, 2005 - Impulse Point, a leading endpoint security provider for higher education, was chosen to implement its Safe•Connect™ policy management system at this year's League for Innovation in the Community College's 2005 Conference on Information Technology, October 23-26 in Dallas, Texas.

The Impulse Safe•Connect™ solution will assist more than 2,000 conference participants in maintaining compliance with the League's acceptable use Internet security policies. The Safe•Connect™ system will automate the process of ensuring that conference attendees are update-to-date with the most current anti-virus, anti-spyware, and Microsoft security patch software that are an essential part of providing a safe computing environment. Each user attempting Internet access will be guided through personalized instructions on how to meet the required security policies or how to contact Conference Technical Support for assistance.

"It is our responsibility to provide a highly secure and available Internet experience for conference participants," says Edward Leach, Vice President of Services and Programs for the League for Innovation. "Our partnership with Impulse Point enables us to proactively manage the security posture of every user device which attempts access to our conference's wireless network, which will prevent the security outbreaks we have experienced in past events."

"As a Distinguished Corporate Partner of the League, we are pleased to be able to provide this service," says David Robinson, CEO of Impulse Point. "The flexibility and ease of deployment of our Safe•Connect™ system allows it to be adapted to a myriad of academic environments including short-term events such as conferences where unprotected systems may spread worms, viruses, and malware to large numbers of attendees and wreak havoc on network resources."

About Impulse Point

Designed for higher education's unique environment, Impulse Point enables institutions to automate and enforce end user authentication, anti-virus, anti-spyware, Microsoft security patches, illegal P2P music file sharing, and bandwidth consumption policies. The result is a more secure, reliable, and available IT network infrastructure that balances the institution's desire to maintain a safe computing environment with academic freedom. Impulse Point (www.impulse.com) is headquartered in Lakeland, Florida and is one of Tampa Bay's premier technology innovators.

About the League for Innovation

The League for Innovation in the Community College (www.league.org) is an international organization dedicated to catalyzing the community college movement. The League hosts conferences and institutes, develops Web resources, conducts research, produces publications, provides services, and leads projects and initiatives with more than 700 member colleges, 100 corporate partners, and a host of other government and nonprofit agencies in a continuing effort to make a positive difference for students and communities.
