

SENIOR SOFTWARE ENGINEER

THE COMPANY

Impulse Point is a leading provider of Contextual Intelligence™ and access control solutions in support of BYOD-friendly education and enterprise environments. Impulse securely and efficiently automates device management by combining our real-time, context-aware architecture, remote managed support services and customer-centric business philosophy to enable customer freedom. Our customers know this as The Impulse Experience.

JOB SUMMARY

We are seeking a Senior Software Engineer to join the SafeConnect product team at Impulse. In this role, you will work within a team of software engineers helping design, code, test, and deploy new and existing SafeConnect features. The ideal candidate will have a desire to build well-engineered backend services with the ability to work both independently (spearheading specific features) and in cooperation with others to ensure the new features fit well into the overall existing solution.

ESSENTIAL DUTIES AND RESPONSIBILITIES

- Design, develop and deploy high quality backend services that handle a high volume of transactions in a highly available fashion.
- In addition to hands-on coding responsibilities, participates in design and peer reviews to improve overall quality of deliverables.
- As part of coding, think like an Operations or Support person (DevOps) to ensure ease of deployment and supportability are built-in.

EDUCATION / SKILLS / QUALIFICATIONS

- BA/BS in Computer Science/ Engineering or equivalent experience
- 10+ years' experience in software development within customer-facing networking and security-related product-oriented industries
- Experience designing and developing for public cloud platforms such as AWS or Google Apps desired
- In-depth expertise in Linux desired
- Expertise in TCP/IP networking and application integration
- Experience in Java/J2EE web-based software development (Servlets, ActiveMQ, JMS, RESTful APIs)
- Working experience with Tomcat or other web application server

- Working knowledge of MVC design pattern and frameworks, especially Spring Data Access and ORM framework experience (Hibernate / JPA, IBATIS, other)
- Proficiency in SQL Procedures, HTML, SQL, XML, JSP, JavaScript
- Knowledge of Java, Virtual Machines, Windows, MAC OS
- Understanding and appreciation for test automation tools and frameworks (JUnit, Selenium WebDriver) and experience with code coverage and performance benchmarking tools

Impulse offers a highly competitive compensation package and the professional advantage of an environment that recognizes your contributions and supports continued personal development. Impulse offers a comprehensive benefits package which includes Medical / Dental / Vision Insurance Plan options, Flexible Spending Accounts, Health Savings Accounts, 401K Retirement Plan, Life Insurance, Equity Participation, Vacation, Sick and Holiday Paid Time Off, and Tuition Reimbursement.

Impulse Point is an Equal Opportunity Employer.
